INSTRUCTIONS FOR AUTHORS

Acta logistica

Manuscript and cover letter: Responsibility for the content of a manuscript rests upon the authors and not upon the editors or the publisher. The authors must write the manuscript and the cover letter in English. The manuscript and the possible cover letter must be prepared electronically by templates of the Acta logistica. Submission of the manuscript for the journal Acta logistica is free of charge. By submitting a manuscript to the journal for the editorial process, the author/s agree with all the conditions stated in the individual sections on the pages of the journal. Therefore, ignorance or non-acquaintance with the information and the journal requirements is not a reason to justify their actions. The authors submit the manuscript and the cover letter by journal e-mail:

info@actalogistica.eu.

or should be sent by e-mail to Editor-in-Chief:

Prof. Ing. Martin Straka, PhD.
Technical University of Košice
Park Komenskeho 14, 043 84 Košice,
Slovak Republic, EU
martin.straka@tuke.sk

The template for the manuscript preparation for the journal Acta logistica (AL) is available here: **Acta logistica.eu Template**.

The template for the cover letter preparation for the journal Acta logistica (AL) is available here: **Cover letter Template**.

Sample of articles: The reference and sample of articles are available from the archive section of the journal website.

Peer Review Process: After submitting a manuscript, authors will receive information about receipt of the manuscript. All submitted manuscripts for the Acta logistica journal are sent out to the peer-review process. The peer-review process takes place in several rounds. In the first round, the manuscripts are reviewed by the journal's editor concerning the quality and focus of the manuscripts. In addition, manuscripts are checked for plagiarism. Manuscripts that are out of the aim and scope do not comply with the plagiarism check of the journal or are of an unacceptably low standard, and quality will be rejected directly without the second round peer review process. From 2018 is the new numbering of the articles by a volume numbering system. Each manuscript will be single-blind reviewed by at least two reviewers. The reviewers will fill out a review form and evaluate the submitted manuscripts. Reviewers will evaluate the following points:

1. The manuscript is relevant for the Acta logistica journal.
2. The manuscript is new, interesting, original and high quality.
3. The manuscript is prepared clearly, logically and correctly.
4. The language of the manuscript is clear and understandable.
5. The manuscript's figures, diagrams, charts, and tables are readable, clear, and high-quality.
6. References of the manuscript are used correctly.

The review process continues to notify authors if the manuscript is possible to accept without modification, accept after modification or reject. The review process ends with checking the final pdf article version and confirming the article for publication in the journal by the authors (if editor and reviewers accepted the manuscript for publishing). The editor of the journal has the right to manage and, in certain circumstances, change the peer review process at his discretion. In case of non-compliance with the conditions defined by the journal, the publisher has the right to reject the manuscript or publish the manuscript in one of the publisher's journals.

Publishing Fee: For accepted regular pages, one standard manuscript (to 12 pages) publisher requires the payment of a publishing fee of 425 EUR for the year 2022. For extra pages (over 12), 20 EUR per page must be paid. The publishing fee includes total editorial activity, including manuscript publishing in one of the future issues of the journal.

Waiver policy: The publishing process involves several activities that require costs, such as copy editing, article conversion in different formats, uploading articles, archiving, DOI, indexing, data storage management and journal maintenance. The journal Acta logistica operates in an Open Access system. Authors are asked to pay an article processing fee to publish their article with open access under a Creative Commons licence. For authors publishing in the journal Acta logistica, the publisher offers waivers and discounts. The provision for complete or partial fee waiver depends on the case-by-case basis for the authors. The request for a waiver must be sent to the journal before submission of the manuscript. The request for a waiver must be sent by e-mail to: info@actalogistica.eu. The authors desirous of requesting a waiver should furnish the following information along with the request for the waiver: Title of the manuscript; Manuscript Type (Research - Scientific, Professional - Practical, Review - Analytical, Educational); Name of the corresponding author; Affiliations of the corresponding author; Type of waiver requested (Partial / Full); Explanatory reasons for waiver request; Explanation about how the research is funded.

Submission Preparation Checklist: As part of the submission process, authors are required to check off their submission's compliance with all of the following items, and submission of a manuscript may be returned to authors that do not adhere to these guidelines.

- The manuscript has not been previously published, nor is it before another journal for consideration (or an explanation has been provided in Comments to the Editor).
- Where available, URLs and available DOIs for the references have been provided.
- The manuscript is prepared following the instructions for the authors.
- The text adheres to the stylistic and bibliographic requirements outlined in the author guidelines, which is found in the "For Authors" folder.
- Author/authors agree with the terms and conditions defined by the journal Acta logistica by sending the manuscript for publishing in the journal Acta logistica.

Ethical rules: The editorial office or the publisher may reject manuscripts if it is felt that the manuscript was not carried out within an ethical framework. Plagiarism in any form constitutes a serious violation of the most basic principles of education, research and scholarship and cannot be tolerated. This policy details all authors, editors and reviewers working with and for Acta logistica (AL) journal and our ethical responsibilities. This includes, but is not limited to, plagiarism, data falsification, misuse of third-party material, fabrication of results and fraudulent authorship. Publisher 4S go, s.r.o. applies ethical principles to all published journals based on the existing principles of the **Guidelines of the Committee On Publication Ethics (COPE)** and of the **ELSEVIER Publishing Ethics Resource Kit**.

Manuscript preparation: The original manuscript should be submitted electronically in single-column format and single line spacing. The font type of manuscript is Times New Roman size 10 pt. Page form A4 is the page size of the manuscripts with standard margins of 2.5 cm at top, bottom, left and right. The manuscript should have ranged from 4(minimum) to 12(maximum) pages, including figures, tables, charts, and attachments. A final manuscript that would **exceed more than 12 pages** may be returned for abridgement. All manuscripts must be written in correct English. In addition, the manuscript must adhere to the scientific structure of the preparation of contribution - Introduction, Main text containing the Methodological basis, Experimental part, Results and its Discussion and Conclusions.

The text of the manuscript should include the following:

- Title: as short as possible, with no abbreviations or acronyms.
- Address: position, department, name of institution, full postal address of each author.
- E-mail: e-mail address of each author.
- Keywords: the limit is min. 3 and max. 5 words or phrases. Keywords are important for online searching.
- Abstract: the maximum limit is no more than 250 words.
- Main text: contains information about new knowledge, which have been obtained from research, study, or the proposal of a solution to project tasks.

- Acknowledgements and notice: this section contains information about the source documents from which the manuscript is made.
- Figures and figure captions: all illustrations, whether diagrams or photographs, are referred to as Figures. All figures have a description below the figure. All figures can be made in colours. Figures must be prepared in high quality must be computer-drafted or digitalised with a resolution of at least 300 dpi. Figures must be numbered sequentially. Please prepare all figures, especially line diagrams, to the highest possible standards.
- Tables and table's captions: all tables have a description above of table. All tables can be made in colours. Tables must be numbered sequentially. Please prepare all tables to the highest possible standards.
- Units of measurement: Acta logistica - International Scientific Journal follows the International System (SI) of units.
- References: Full references should include all author names and initials, the date of publication, the title of the article or book, the title of the publication (italics), the volume and issue number (of a journal), the publisher and form (books, conference proceedings) and page numbers. If authors have a problem preparing the references list, you can use the online service www.citethisforme.com with citation style **IEEE**.

Copyright Notice: The publisher has the right to if and when the submitted and accepted manuscript will be published in the journal as the article. The publisher is the copyright owner of the published articles. The publisher may grant license rights of published articles and their content to third parties without the consent of the authors. Any uses and/or copies of published articles and any parts of the journal Acta logistica must include the customary bibliographic citation, including author attribution, article title, journal title, date, URL and DOI number. The journal license is CC BY-NC.

Privacy Statement: The names, addresses and e-mail addresses entered in this journal site will be used exclusively for the stated purposes of this journal.

Digital Archiving and Preservation Policy: Digital preservation of the journal Acta logistica is the set of processes and activities that ensure the information that now exists in digital forms and is backed up and distributed to guarantee continued access for the long term. The electronic content of the journal Acta logistica is stored on several different sources. The journal Acta logistica is online and accessible for the readers from the central server. The copy of the same content is kept as a backup on the server of the University Library in Bratislava. At least one of our journal's

Abstracting/Indexing services archives the full electronic versions of the articles, as well. Suppose we are forced to stop publishing the journal due to some rare, unfortunate circumstances. In that case, articles published in the journal Acta logistica will remain online and accessible to the readers still.

Complaints Policy: This procedure applies to complaints about the policies or procedures of the Acta logistica activities. Please write your complaint to identify the journal title, volume, issue, DOI paper number, paper title, page number. The complainant defines the expression of unhappiness as a complaint. The complaint must be about something within the responsibility of the journal Acta logistica content or process. If the journal Acta logistica receives a complaint that any contribution to the journal infringes intellectual property rights or contains material inaccuracies, libellous materials or otherwise unlawful materials, the journal Acta logistica will investigate the complaint. The journal Acta logistica will make a good faith determination whether to remove the allegedly wrongful material. We strive to ensure that Acta logistica is of the highest quality and free from errors as possible. However, we accept that occasionally mistakes might happen. Complaints about the editorial content of the journal Acta logistica should be made and sent as soon as possible after publication by e-mail to: info@actalogistica.eu.

Open Access Policy: The Acta logistica (AL) scientific journal provides immediate open access to its content on the principle that making research freely available to the public supports a greater global exchange of knowledge. The version of the final article is published as open access, and the article is made freely available online by web pages of the journal Acta logistica. Authors of articles take due note and at once accepts the open access policy of the journal Acta logistica. Journal articles saved and made available on the Acta logistica journal internet pages are free and available for users to read, download, copy, distribute, print and search. Links to the full texts of these articles is possible to use for indexing. Articles and links can be used as free data or for any other lawful and noncommercial purpose. This work is licensed under a **Creative Commons Attribution-NonCommercial 4.0 International License**.

Aim and Scope: The aim of the Journal Acta logistica (AL) is to provide the academic platform in industrial logistics fields, including transport, education and pedagogy in logistics, science and research in logistics, which are available to the general public and those interested in logistics and transportation, including students, academics as well as industry experts. The papers offer imaginative and creative solutions to specific logistical and transport problems. Furthermore, the journal aims to promote and provide young scientists and educators with the opportunity to publish original research to create future professionals in this field and act as the driving force of the economy and society.

The output and establishment of the magazine are a direct consequence of the requirements of the European market for a specialised non-business magazine. Acta logistica (AL) - International Scientific Journal about Logistics is a non-trade journal focused on logistics, not only in Central Europe. Acta logistica is opened journal with free articles for all readers with open access platform. The editors intend to attract experts in the field and anyone wishing to expand their knowledge of logistics, transport, education, and pedagogy in this area.

The journal focuses mainly on original, interesting, new and quality, theoretical, practical and application-oriented contributions to the scientific fields and research and pedagogy and training in logistics and transport.

Acta logistica scientific journal focuses mainly on those industries that have an impact on logistics or are part of logistics (and not just about them):

Algorithmization and Programming	Human Resources Management	Production and Manufacturing
Application and Practical Research	Industrial Engineering	Production Planning and Control
Autonomous Systems	Industrial Management	Project Management
Business and Commercial Services	Information Flows Management	Public Transport
CAD/CAM Systems	Inside Transportation	Purchase and Supply
Clarke-Wright savings algorithm	Inventory Management	Quality, Reliability, Maintenance Engineering
Combined Transport	Job-Shop and Flow-Shop Systems	Queuing Systems
Controlling	Layout	Rail, Air, Truck, Sea Transportation
Design of Logistic and Transport Systems	Location Tasks	Reverse Logistics
Discrete and Continuous Systems	Logistic Information Systems	Salesman Tasks
Distribution and Transport	Logistics	Service Engineering
Economy and the Sectoral Economy	Material Handling	Simulation and Modelling
Education and Pedagogy	Measurement	Statistical Analysis
